Vessel Tracking System

The new 3i Technologies' Vessel Tracking System Version 3.0.1. Designed to make your tracking needs easy, effective and efficient while giving you a wealth of information about your fleet worldwide in real-time.

The new Vessel Tracking System (VTS) from 3iTechnologies is a web based online portal to track and manage your fleet in real-time anywhere, anytime.

With this new revamped version, we are offering three new features to the VTS.

New Features

- **Sea-Voyage and Sea Routing**
A completely new planning tool to plan the most effective and efficient sea routes from Port of Origin to Destination.
- **Weather Integration**
Anticipate weather conditions that might affect your vessels' operation and take decisive actions to remedy any issues.
- **Credit System**
A brand new payment system for Vessel Tracking Services. No more monthly payments. Pay for what you use across your entire fleet. Switch on/off features when you don't need them, saving you cost.

Key Features

- ✓ Web based online portal
 - Easy, multi-platform capability
- ✓ Manage your fleet in real-time.
 - The tracker on your vessel gets position and vessel performance information and relays through SkyWave to the VTS server which can then be viewed on the online portal.
- ✓ C-MAP Integration for easy visibility of fleet around the world and sea conditions.
- ✓ On Demand Position Reporting / Polling.
- ✓ Custom Configuration of SMS, Email Alerts for your entire fleet.
- ✓ New Credit System. No more Monthly Statements!
- ✓ Access Control of specific vessels to specific users.
- ✓ Geo Fencing Alerts.
- ✓ Position History of your vessel.
- ✓ View Invoices and Credit Plans on portal for easy payment information.

Coming this March 2011
