

3i Mobile Assets Tracking & Management

 **3i Technologies**
All eyes on your interests

One-Stop, Real-Time Services to keep you in the know

Our vessel and vehicle tracking services are tested and trusted solutions that enhance the safety, security, and management of mobile assets both on land and at sea.

3i Vessel Monitoring System (3iVMS)

3iVMS is your solution for effective fleet management across the seven seas. It combines GPS, satellite communications and graphical information systems to provide real time updates on vessel locations for maritime operations.

Comprehensive Features

Tracking

- Measuring behaviors of vessel operational criteria
- Precise geographic position with tracking record
- Engine and fuel monitoring

Security

- Alert Configuration
- Geofencing (port entry/exit alert)
- SOLAS compliance
- Panic Alert

Reports

- Spatial and tabular reports of vessel performance through satellites
- Location reports via email
- Operational perturbations recorded and raised as alarm via email or sms

3i Automated Vehicle Tracking System (3iAVTS)

3iAVTS is a specialized tracking system for monitoring land transport vehicles in real time. The system provides a web-based track and trace system that enable the user to achieve the following at the end of the journey:

- Real time tracking of all vehicles
- Onboard information of vehicle
- Time and activities performed on site
- Generation of reports

Better Mileage For Your Investment

- Reduced operational, maintenance and communication costs
- Increased fleet utilization, efficiency and productivity
- Enhanced driver and asset safety
- Competitive advantage in the market place through improved customer satisfaction with proof of delivery and estimated time of delivery

About 3i Technologies Pte Ltd

3i Technologies provides customized security and surveillance solutions across industry verticals by partnering with key communications providers and hardware manufacturers. 3i solutions include mission critical systems for use in maritime and terrestrial fleet management.
